

Survey of member institutions about own transfer practices

Spring 2021 – Minnesota Private College Fund and Council

In the spring we surveyed our member institutions on these topics, preparing a table that summed up results that included transfer students as a percent of their new student population.

Topics:

- Does the Minnesota Transfer Curriculum fulfill core curriculum or general education requirements at your institution?
- Does an Associate of Arts degree fulfill core curriculum or general education requirements at your institution?
- Do you have articulation agreements with community colleges?
- Do you offer advising to community college students?
- Once enrolled, do you offer any programming for transfer students who have come from community colleges?
- Do you offer transfer-specific financial aid?
